

Dimensions: 549mm Long x 185mm Wide x 228mm High

Main Features

As a result of their quietness, reliability and low energy consumption, the self-priming “PLURIJET” pumps are recommended for use in domestic and civil applications such as the pressurisation and distribution of water in combination with pressure sets, and in rain water recovery and irrigation systems, etc. They are designed to pump water even in cases where air is present. Suitable for use with clean water even where air is present and with liquids that are not chemically aggressive towards the materials from which the pump is made. The pump should be installed in an enclosed environment, or at least sheltered from inclement

Technical Specifications

<input type="checkbox"/> Performance Range:	200 l/min (12,0 m³/h)	Suction Head	9m
<input type="checkbox"/> Total Head	97m
